

INSTALLATION INSTRUCTIONS

500 Series

Attach the universal crossbar to the junction box with the 8-32 screws. Note the crossbar can be rotated to orient the brass thumbturns.

Attach the leads to the socket.

Align the socket keyhole openings, small ends, over the 3.5" c-c tapped holes on the crossbar.

Attach the socket using the threaded rods as far as the stop nuts.

Slip the fixture over the rods and secure with the brass thumbturns. Do not overtighten.

SPECIFICATIONS

Junction box: octagonal metal or round plastic, attachment holes 3.5" c-c, 8-32 tapped. The universal crossbar can accommodate other types as well. Different sized screws may be required.

Socket: E26
